HELPING YOU MAINTAIN YOUR **BUILDING & SITE**

FOR **EVERYDAY MAINTENANCE** AND UPGRADES, WE'RE BY YOUR SIDE

Site Safety

Using the correct safety equipment and displaying the correct signage is a legal duty of employers. Whether its fire equipment, First Aid, spill control, traffic management or signage we've got you covered.

Test Equipment & Calibration

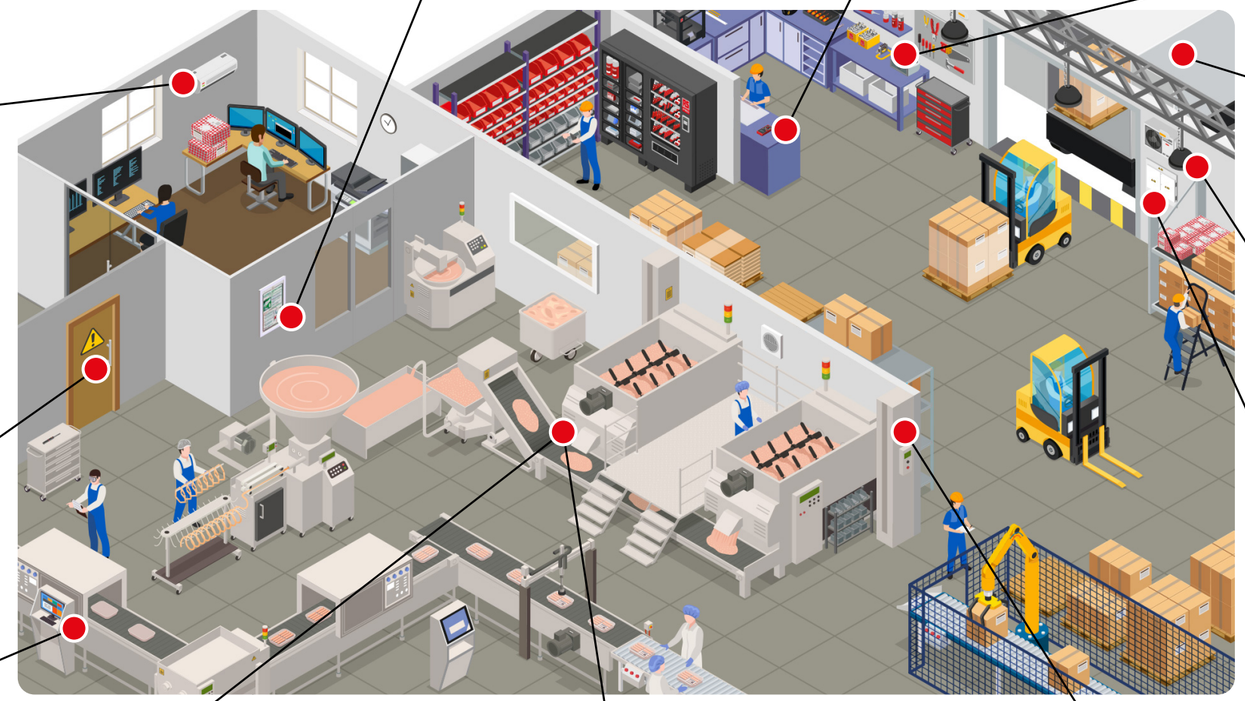
Essential instruments for general electrical maintenance, energy usage management, electrical safety and data networks troubleshooting. Our in-house calibration service provides confidence on new and existing equipment accuracy.

Tools

Does your workshop have the right tools to get the job done quickly and effectively?

HVAC & Plumbing

Keeping the environment at the right temperature and adequately ventilated is critical to employee comfort. We also have a wide, stocked range of plumbing parts to keep essential services operational.



Security

Whether you need to control access to your building with a door entry system or monitor who's coming and going with CCTV we can help. We also have a wide range of locks, safes, key cabinets and padlocks to help keep you and your employees safe and secure.

Cable & Cable Management

All your cable needs, whether it be for power, data, automation and control, plus everything needed to manage and protect the cables throughout the site.

Lighting

Save energy and reduce maintenance time with LED lighting. Our extensive range covers all aspects of external, internal and machine lighting.

RS Maintenance Solutions

Proven to maximise productivity, minimise wastage and extend asset lifetime for both buildings and production lines, leading to reduced operational costs, optimal performance and improved yield.

Energy Monitoring

Simple and advanced power monitors which can help you measure and track your electrical energy usage, helping pinpoint where savings can be made or help justify additional investment.

Variable Speed Drives

Control fans and pumps in a more energy efficient and cost effective way using a inverter drive, rather than simple off/on direct online starting or using dampers.

Electrical Installation Accessories

Industrial and commercial wiring accessories for all your electrical needs across the site.

Circuit Protection & Distribution

Power distribution and circuit protection are vital for the safe and reliable operation of any manufacturing site.
